Background:

James Fraser Mustard was the first chairman of the Department of Pathology at McMaster University in 1966. In 1972, he succeeded Dr. J.R. Evans as Dean and Vice-President of the Faculty of Health Sciences. In 1982 he became president of the Canadian Institute of Advanced Research. He is a Fellow of the Royal Society and has been named officer of the Order of Canada. The author of more than 400 scholarly publications, he has been awarded D.Sc. from the University of Western Ontario and from McGill University. His papers span a period of 1957-1986 and reflect many aspects of his career.

Content:

There is one accrual. Although these papers originate in Dr. Mustard's office, they were obtained in two different ways. Some material came to the Archives in 1975. Unfortunately these papers were amalgamated with papers from other offices of the Faculty of Health Sciences. In 1985 an office on the third floor of the Health Sciences Centre was cleared out. The office contained papers from various departments within the Faculty. However a substantial amount had been created by Dr. Mustard. In 1985-1986 all the papers of Dr. Mustard were brought together in an attempt to restore provenance.

The records are organized into 5 subseries:
